Dear Parent / Carer,

PHSCE Curriculum – Oral Hygiene

We are planning a series of lessons next week about Oral Hygiene as part of our PHSCE curriculum. We will be discussing the importance of good oral hygiene and what the children can do to look after their own mouth and teeth, including how to brush their own teeth effectively. We will supply each child with a brand new tooth brush and toothpaste, and will be using disclosing tablets to help demonstrate good brushing techniques. Disclosing tablets contain a harmless dye which stains the plaque on teeth and makes it visible to the human eye. It is a practical and enjoyable way of learning about oral health.

If your child has any allergies to the following ingredients, please can you let school know by e-mail before Tuesday 4th May 2021.

Thank you for your support.

J. Hunt
